Lesson Plan (GE, Semester II, April to July 2023)

Name of Teacher	Ms. Princy Jain	Department	Economics
Course	Common Pool GE for Hons	Semester	II
Paper	Principles of Macroeconomics-I	Academic Year	2022-23

Learning Objectives

The course provides an introduction to a core area of economics known as macroeconomics. It considers the operation of a market economy and the problem of how best to allocate society's scarce resources. The course considers the way in which various decision making units in the economy (individuals and firms) make their consumption and production decisions and how these decisions are coordinated. It considers the laws of supply and demand, and introduces the theory of the firm, and its components, production and cost theories and models of market structure. The various causes of market failure are assessed, and consideration is given to public policies designed to correct this market failure.

Learning Outcomes

- **Knowledge and Understanding**
This course aims to develop an understanding of the framework that economists use to analyse choices made by individuals in response to incentives and consider how these choices can also serve the social interest. The course introduces students to models of how individuals and firms interact within markets, when markets fail, and how government policy may improve outcomes for society. (Learning outcomes 1-6)
- **Communication Skills**
This course aims to develop students' abilities to construct and sustain an argument using the phrases and concepts that economists use in their deliberations. A theoretical framework is developed in which students acquire an understanding of how economic agents interact and by doing so develop the literacy and verbal communication skills necessary for presenting arguments of an economic nature.

Lesson Plan

Week No.	Theme/Curriculum	Any Additional Information
Week 1-2	Unit-1 <ul style="list-style-type: none">• What is Macroeconomics, microeconomics vs macroeconomics, what is macroeconomics? Macroeconomic issues in an economy. Macroeconomic Policies, Real GDP	Allocation of Test for Continuous Assessment

Week 3-4	Unit 2 <ul style="list-style-type: none"> National Income Accounting, Concepts of GDP and National Income, measurement of national income and related aggregates nominal and real income; limitations of the GDP concept. Numerical on NIA 	Allocation of Test 1
Week 5-6		
Week 6	Unit 3 <ul style="list-style-type: none"> Actual and potential GDP; aggregate expenditure, autonomous expenditure Consumption function, concepts of MPS, APS, MPC, APC, Factors affecting aggregate consumption investment function, equilibrium GDP; Concept of multiplier. 	Allocation of Project Assignment
Week 7-8		
Week 9-10		
Week 10-11	Unit 4 <ul style="list-style-type: none"> Fiscal Policy: impact of changes in government expenditure and taxes net exports function; net exports and equilibrium national income. 	Allocation of Test for Continuous Assessment
Week 12		
Week 13	Unit 5 <ul style="list-style-type: none"> Concept of money in a modern economy; monetary aggregates; demand for money; quantity theory of money liquidity preference and rate of interest; 	Allocation of Test 2
Week 14		
Week 15
